## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 15, 2007 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-10, 13-20, and 23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 1, 13, 23, and 50 recite the limitation "...address of the service..." This limitation does not have proper written description support in the Applicant's specification. The specification teaches an IP address of the printer and not

a service (see page 68, lines 12-15; page 69, lines 16-18; page 71, line 22 – page 72, line 2; Figures 37-39). Accordingly, the examiner will treat this limitation to mean an IP address of the printer and not a service.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

**Claims 1-10, 13-20, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eldridge et al. (US 6,421,716 B1) (“Eldridge”) in view of Wu (US 7,312,887 B2).**

Referring to claims 1-7, 10, 13, 14-18, 23, and 50: Eldridge teaches a service information providing apparatus comprising: a service providing part for configured to provide a service which a user utilizes, wherein said service providing part further includes a service information providing part configured to provide information concerning the service in response to a request from a user terminal to the user terminal, the information utilized when the user selects the service, and wherein the service is configured to operate a hardware resource which performs image formation (Abstract; Figure 8, “804”). Eldridge does not teach that the information provided to the user terminal includes an address of the service and type of service. As noted above in the rejection under 35 U.S.C. 112, first paragraph, the examiner will treat this limitation to mean an IP address of the printer and not a service. Wu teaches providing a user’s terminal with information that includes the IP address of the printer (*Figure 7, “702” and*

"704"; col. 6, lines 40-52). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to incorporate this feature into the invention of Eldridge. One of ordinary skill in the art would have been motivated to do so in order to display pertinent information about the printer to the user.

Referring to claim 8, 9, 19 and 20: The cited prior art discloses or suggests all the limitations of claims as noted above. The cited prior art does not teach that the information concerning the service stored in said service information storing part is written in at least two languages, and the request includes language indication information indicating a language of the information of the service, the information to be included in a response corresponding to the request. However, the Examiner notes that this limitation is not functionally involved in the elements of the recited system. Therefore this limitation is deemed to be nonfunctional descriptive material. The elements of the apparatus would be the same regardless of what language the service was written in. The difference between the claimed invention and the prior art is merely subjective. Thus this nonfunctional descriptive material will not distinguish the claimed invention from the prior art in terms of patentability, see *In re Gulack*, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983); *In re Lowry*, 32 F.3d 1579, 32 USPQ2d 1031 (Fed. Cir. 1994) also see MPEP 2106. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to write the service of Eldridge in whatever language the user desired because such information does not functionally relate to the elements of the claimed system and because the subjective interpretation of information does not patentably distinguish the claimed invention.
